

Brief Manual on the Mobile 3D Demo

We have just released a 3D demonstration program that can be run on Android devices. Please follow the steps below to test the interesting 3D GIS features.

1. Download and Install:

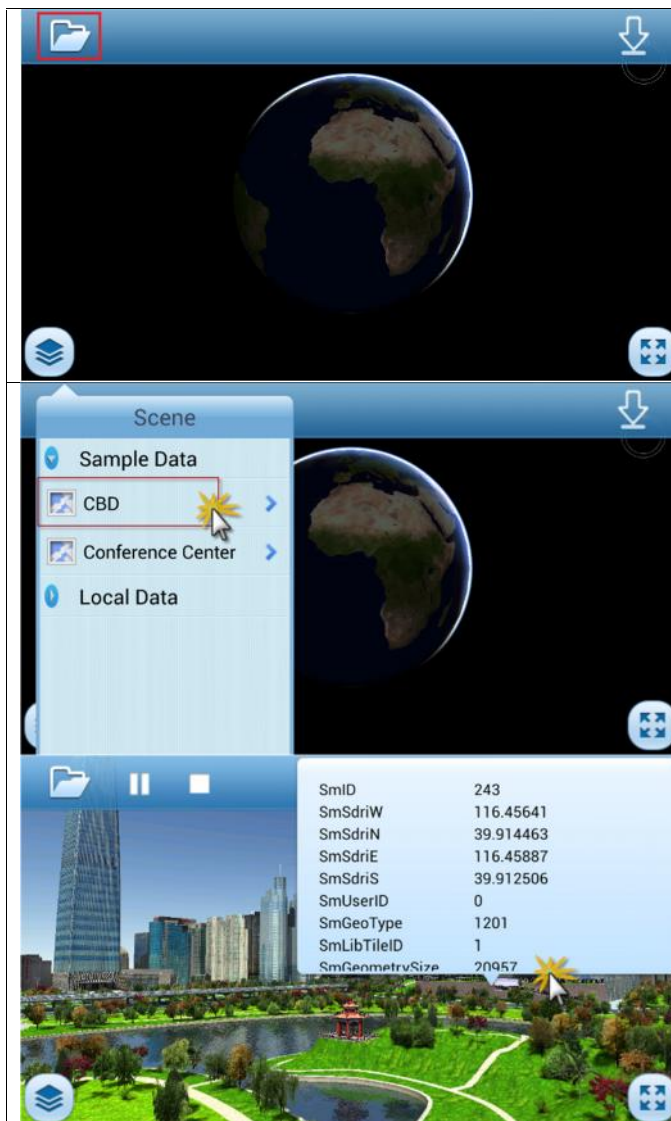

Download the program from Dropbox: <https://db.tt/Ch3mUwB0>

Then install it on your Android devices.

2. Run the Program:

Click the  icon on your device and run the program.

When the program is successfully run, you will see an interface like this. Click the icon to open the **Sample Data**.

Click **Sample Data** and click **CBD**, then you will see the 3D models of the central business division. You can move your fingers to navigate the whole area. You can also click any model to check its attribution.

	<p>Click the Play icon and see an automatic navigation along the specified route.</p>
	<p>Go back to the main menu, and click Conference Center. You will see the indoor 3D view of the national conference center.</p>
	<p>You can move your fingers to navigate around the conference center. You can also click the Play icon and see an automatic navigation along the specified route.</p>
